

# New NASA Images Document Loss Of Water In Central Valley

By Joe  
Moore

A new set of satellite images [released by NASA](#) shows the dramatic loss of water storage in the Central Valley due to California's long term drought. According to research by NASA's [Gravity Recovery and Climate Experiment Team](#), the Sacramento and San Joaquin River basins together lost 12 million acre feet a year between 2011 and 2014, largely due to agricultural groundwater pumping. The findings were published in a recent edition of [Science Magazine](#).
