

End medical brain drain

January 1, 2015

My husband Don, a Parkinson's sufferer, finally got lucky when he became a patient of Dr. Jeffrey Rosenfeld. For many years, we had driven to Sunnyvale for "updates" and checks and only got minimal care.

Dr. Rosenfeld provided an in-depth verbal analysis of my husband's condition by changing his meds and offering helpful suggestions to better his condition — all with compassion, caring and know-how.

We were devastated to learn of Dr. Rosenfeld's departure from UCSF Fresno. It is tragic how many gifted, talented and highly educated physicians leave Fresno to go elsewhere.

Why is that? We feel strongly that something must be done to stop this brain drain.
